

Belts

Spare parts guide

Belts

Benefits

BAC belts are selected and <u>tested</u> for each BAC unit type, ensuring **year-round reliable** and **vibration-free operation** of your BAC cooling equipment.

Features

- Type, size and quantity of belts depend on BAC unit type.
- Minimum operating life-time expectancy of 25.000 hours.
- **Belt set** includes suitable belts for each specific unit based on the unique serial number.

Maintenance tip!

When replacing belts on a multiple belt drive system always make sure to **replace the complete set**, and re-check alignment en tensioning. In case of premature belt wearing consider to replace the complete <u>drive set</u>.

Proper **belt tension** is vital for a long belt service life. Check the <u>operating and maintenance manual</u> of your BAC equipment for proper belt tension information.

Want to replace the belts of your BAC cooling equipment? Contact your <u>local BAC representative</u>.
